

STERILIZE MORE FOR LESS.

We know how important the bottom line is. The STERIZONE® VP4 Sterilizer can significantly reduce operating capital and labor costs.

A SYSTEM DESIGNED TO SAVE

- Dynamically delivered sterilant uses only as much sterilant as you need
- One cycle reduces need for multiple biological indicators that are required in multi-cycle sterilizers
- Larger load capacity up to 75 lbs¹ of mixed instruments can increase your throughput and reduce your sterilization capital equipment needs

PROVEN CUSTOMER COST SAVINGS

~300 bed hospital, Washington D.C.

- "We had 4 [competitor] Sterilizers, now we have 2 STERIZONE VP4 Sterilizers."

~300 bed hospital, ND

- Service expansion—added sleep center, ENT scopes, endoscopy reprocessing, neurosurgeon with full case load, robot for robotic joint replacement.
- "STERIZONE VP4 Sterilizer, 50% less cost per instrument sterilized than competitor."

~250 bed hospital, NY

- "50% less cost per instrument sterilized than competitor."

Imagine what you can do with the savings. Buy more devices, schedule more procedures, or even take on more sterilization responsibilities within your health system.

STERIZONE®
VP4 STERILIZER

OUR MISSION: A STERILE DEVICE FOR EVERY PATIENT.
